
Company profile

Mieloo & Alexander Business Integrators

Mieloo & Alexander Business Integrators is a consulting firm specialising in technology enabled business improvement. We successfully design, plan and implement solutions and transform your organisation to achieve sustainable competitive advantage.

We have years of experience, in-depth knowledge of your business and technology and a true hands-on, get it done mentality that has resulted in strong and lasting client relationships.

The professionals working out of our Rotterdam office on projects across Europe deliver outstanding client service, measurable results and satisfied customers.

Services, Areas of Expertise

Mieloo & Alexander supports clients to:

- (Re)design business processes and transaction processing system architectures;
- Build and implement integrated transaction processing front- and back-office applications;
- Design, build and deliver the integrated technical infrastructure to run these applications on;
- (Project) manage the financial, technical and organisational change risks associated with implementation.

We are experts at CRM, SCM, maintenance and service management, financial and management accounting and technical application and IT infrastructures. And because RFID/EPC will be embedded in all of these areas, we pioneer both its technological and business application in these fields.

Managing Risks, Responsibility for Results

In all of this, we take on the (project) management of the financial, technical and organisational risks involved. We work closely with our clients, sharing responsibility for the quantitative and qualitative results.

Our team of professionals is fast to respond to your needs with thorough advice and practical help. Our consultants are highly motivated, well educated and immersed in our philosophy, project management and consulting concepts, methods and tools.

Clear, Systematic and Determined

We are clear and honest in our dealings, proposing only that which adds real value to your organisation. We are systematic and thorough in our execution, creating clarity and improving on structures. And we are determined and committed, doing whatever and whenever it takes to deliver as agreed.

Long-lasting Client Relationships

Mieloo & Alexander works for a variety of multinational clients on projects across Europe. In recognition of our ability to deliver on what we promise, we have built long-lasting relationships with companies such as Hunter Douglas, Sony Europe and Akzo Nobel.
